## 15. Remarks

This application is filed pursuant to the provisions of N.R.S §533.515 in that it seeks to add the reservoirs described in Attachment "A" and as listed in Item 11 above as additional points of diversion for the water rights described herein. This application is also filed as part of the implementation of the operating agreement described in Section 205 (a) of Public Law 101-618. Because of the provisions of California Water Code section 1231 and 1232, California will recognize any permits issued by the Nevada State Engineer based upon this application. Therefore, it is within the jurisdiction of the Nevada State Engineer to approve this application allowing for the storage of the consumptive use component of these Nevada water rights in California.

Water diverted to storage under a permit issued hereunder will be and is the subject of applications for secondary permits for beneficial uses allowed by the Truckee River Operating Agreement at the places allowed by that Agreement. The amount of water diverted to storage under a permit issued hereunder in any one year will not be less than the full permitted duty of 4.5 AF per year. The amount of water under a permit issued hereunder which may be in storage at any one time and which may be released and used from storage in any one year will not exceed the amounts allowed by the Truckee River Operating Agreement.

If the water right described herein is not diverted to storage, the full duty of the water right will continue to be diverted at its allowed points of diversion for its manner of use.
